LAB EXPERIMENT NO.

08

LIST OF TASKS

TASK NO	OBJECTIVE
01	Write a program, which creates an array of 20 elements of type integer and initializes each of the elements with a value equal to the index of the element multiplied by 5. Print the elements to the console. $\text{Array}[2] = 2 * 5$
02	Write a program, which reads two arrays from the console and checks whether they are equal (two arrays are equal when they are of equal length and all of their elements, which have the same index, are equal). $\text{Array}[6] = \{1, 1, 1, 2, 2, 9\}$ $\text{Array2}[6] = \{1, 1, 1, 2, 2, 2\}$
03	Make a program in C# in which take 5 numbers from user and then give sum and avg. of them. Using arrays.
